ACADEMIC PROJECTS

Movie Recommendation System Using Collaborative Filtering (09/2019 - 03/2020)

Created a web application using Python, Flask, and SQL to store user data information. We then derive recommendations using Collaborative Filtering. Various libraries like Jupyter, Pandas, matplotlib, and Seaborn were used and the Kaggle dataset to download movie data.

Image Caption Using Machine Learning (04/2020 - 07/2020)

We leverage the capabilities of artificial neural networks to caption an image based on its significant features. With an image as the input. The method can output an English sentence describing the content of the image. To achieve this CNN and RNN are used on the Flickr8K dataset. Bilingual evaluation understudy (BLEU) score is considered as the evaluation parameter.
